We hereby announce that the Board of Directors decided at its meeting on May 11, 2010 to revise as follows the forecast for the year-end dividend per share for FY 2009 ending March 31, 2010.

### 1. Reason for Revision of Dividend Forecast

This fiscal year, amid the severe business environment resulting from the reduction of worldwide automobile demand due to the global recession, Unipres Corporation has implemented various management measures including emergency profit measures, in addition to the ongoing reorganization of the existing car body parts and transmission parts businesses. As a result, this year's business results have greatly exceeded the initial forecasts and the year-end dividend will be 12.50 yen per share, 5.00 yen higher than that of the previous fiscal year.

We will continue to strive to strengthen the corporate structure and fiscal standing to implement the stable distribution of surpluses to all our shareholders.
