Tel. +81-45-470-8250
Website: <http://www.unipres.co.jp/>

Unipres Corporation has received a new order from JATCO Ltd. for torque converters, which are a main component in automatic transmissions. Details of this new order are given below.

1. Order overview

- | | |
|------------------------------|--|
| - Order content | Integrated manufacture (from pressing through assembly) of torque converters used in automatic transmissions for front-engine rear-wheel (FR) drive vehicles |
| - Planned sales | 7 billion yen per year (estimated for fiscal 2010) |
| - Mass production start date | First half of fiscal 2008 |
| - Production plants | Unipres' Fuji Plant (Fuji City, Shizuoka Prefecture), and a section within JATCO's Fujinomiya Plant (Fujinomiya City, Shizuoka Prefecture) |
| - Plant investment | 1.6 billion yen (2,500-ton transfer press, etc.) |

2. Client profile

- | | |
|------------------------------------|--|
| - Name | JATCO Ltd. |
| - Title and name of representative | Shigeo Ishida, President and CEO |
| - Address | 700-1, Imaizumi, Fuji City, Shizuoka, Japan |
| - Capital | 29,935,300,000 yen (as of March 31, 2007) |
| - Line of business | Development, manufacture, and sale of transmissions and other automotive parts |

3. Future Effect on Business Operations

In the transmission field, we have concentrated for the past several years on module product orders. The current order, following orders for clutch packs and carrier assemblies, is for a core automatic transmission component. We have received it because our high-precision press-forming technology, as well as the cost and quality of our products, are highly appreciated by the client. Along with this order, some of JATCO's

own developmental functions will be relocated to our plant to ensure that development and production take place as a single, integrated process.

In addition to conducting developmental work jointly with JATCO, we will strengthen our own developmental system while further evolving the precision press-forming technology we already possess.

This will allow us to further solidify the operational basis of our transmission component business. We intend to take every opportunity to actively expand our sales in many other fields.
