

Press-Formed Gear

- Mass Production
- Prototype
- Development

Precision

Product Features

- Material costs can be reduced by improving material yield.
- The precision of the press-formed gears is at the new JIS grade 5 to 8 level.

Formable gear shapes

- Formable size : $\Phi 20 \sim \Phi 100$

Product Technology

- Material flow technology using stretch forming and extrusion forming

Pressing Toward a Brighter Tomorrow
