

# Thickness increase/decrease Method for Material Minimization

- Mass Production
- Prototype
- Development

Precision

## Product Features

**【Cost : 25% Reduction】**

Compared to our conventional methods

- Reducing costs by utilizing thinner starting materials
- Enable to minimizing the base material thickness for parts that require localized thickness variations

## Product Technology

- Achieving high-precision press forming while simultaneously increasing and decreasing thickness from a thin metal sheet

**Maximum Thickness Increase: 26% UP**

**Maximum Thickness Decrease: 30% DOWN**
