Battery case (Lightweight and high-strength)

ProductionPrototypeDevelopment

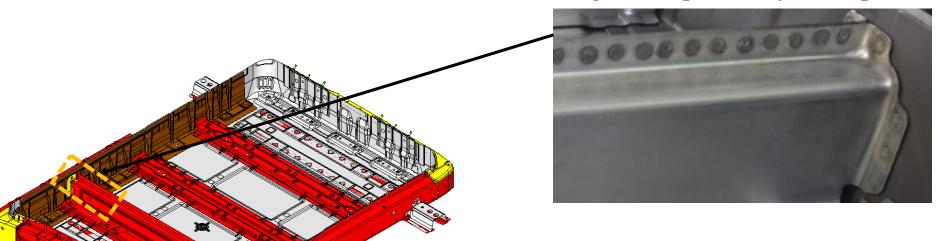

■ Product Features

■ Product Technology

•High strength steel including hot stamping material along with small pitch S/W adopted for the protection of battery.

•Strength is improved by small pitch S/W (1/2 of original)

spot pitch 25mm(conventionally) ⇒10~15mm

•BAT-CASE flamework (crossMBR flame) Application of higher strength materials (590MPa~1.5GPa)
