

Steel / Plastic / Aluminum Press Forming Cover

- Mass-Produced
- Prototyping Available
- Independent development

Precision

Product Features

- Material proposals available based on required performance

Materials
Steel: General steel materials
Aluminum : 1000 series / 5000 series / 6000 series
Plastic : PP + GF (Polypropylene + Glass Fiber)

Product Technology

- Steel: Capable of thin plate deep drawing
- Plastic: Capable of press forming for GF composite materials
- Aluminum: Capable of thin plate drawing

『Prototype Information』

material

Steel (280MPa grade)

1.2mm

Plate thickness

material

Plastic (PP+GF)

-

Plate thickness

material

Aluminum (A5052-O)

1.2mm

Plate thickness

Pressing Toward a Brighter Tomorrow
