

Highly versatile hollow shaft

☐ Production

☒ Prototype

☐ Development

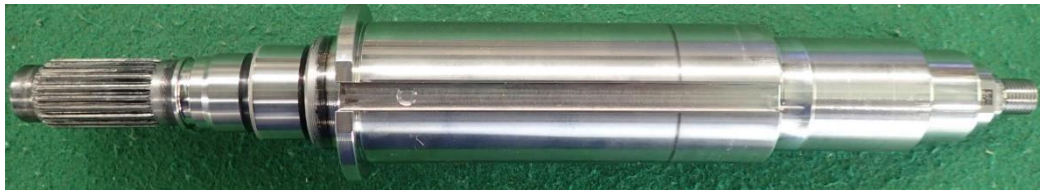

■ Product Features

【Weight reduction : Compared to our company ▲50%】

- Weight reduction by changing from solid to hollow specifications
- Addition of shaft lubrication function by changing from solid to hollow specifications
- Joining separate parts to share parts, joining different materials

Solid rotor shaft

Approximately 50% Weight reduction

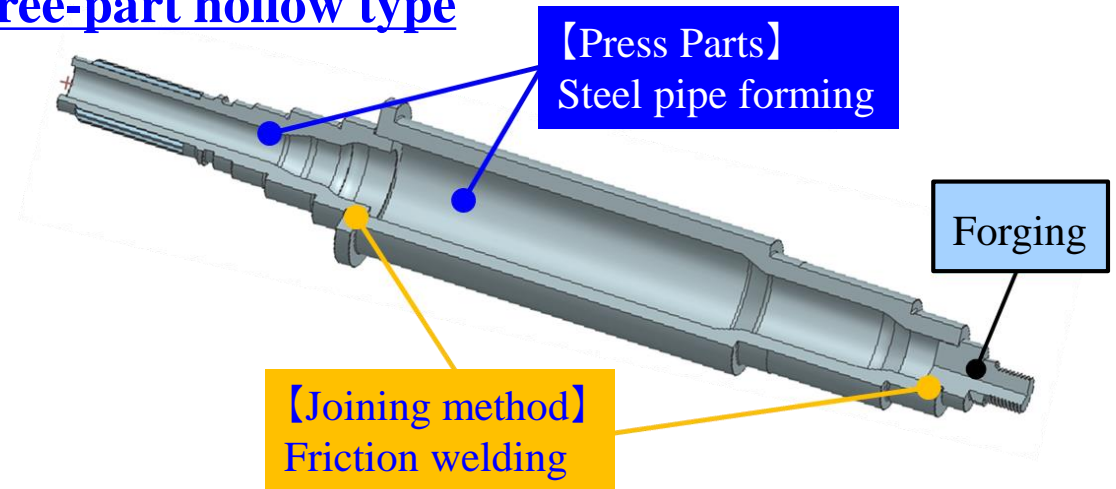

Pressed hollow shaft

■ Product technology

- By forming steel pipes, hollowing is possible without cutting the inside diameter.
- Hollow components can be joined by friction welding

Three-part hollow type

Press Parts (Cross section)
