

Plastic parts with sound absorption properties

□ Production

□ Prototype

■ Development

■ Product Features

- Responding to vehicle quietness in conjunction with electrification
- Proposing products with sound absorption and insulation properties

Transition from engine noise to tire noise

Reduces tire noise by absorbing noise between the road surface and floor

■ Product technology

Non-woven material
Weight per unit area : 1200g/m²

Floor Cover

Non-woven material
Weight per unit area : 950g/m²

Protector Fender

- Application of new nonwoven materials
- Sound absorption performance/rigidity: equivalent to or better than market products
- Icing: Superior performance compared to market products
