

Press-Formed Gear

- Mass-Produced
- Prototyping Available
- Independent development

Precision

Product Features

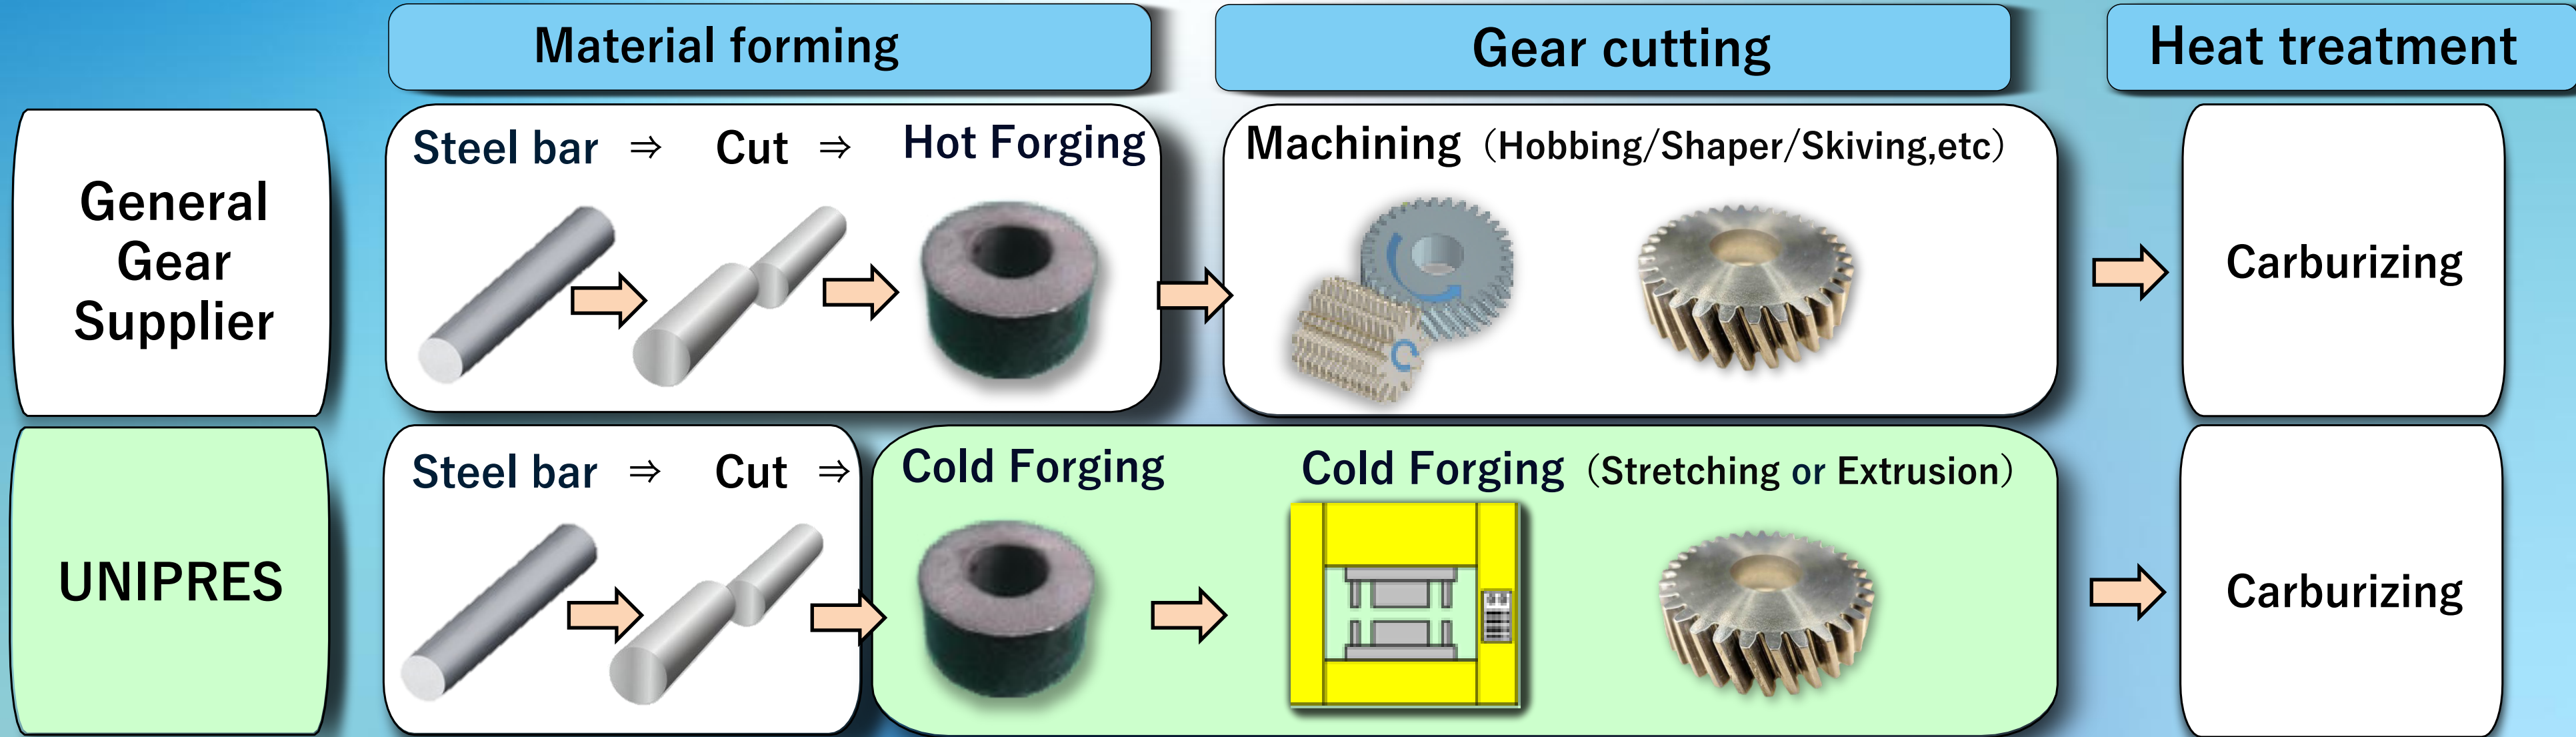

- Material costs can be reduced by improving material yield.
- The precision of the press-formed gears is at the new JIS grade 5 to 8 level.

Product Technology

- Material flow technology using stretch forming and extrusion forming

Formable gear shapes

- Formable size : $\Phi 20 \sim \Phi 100$

Pressing Toward a Brighter Tomorrow
