

Split-Flow Forming Technology for Near Net Shape

- Mass-Produced
- Prototyping Available
- Independent development

Precision

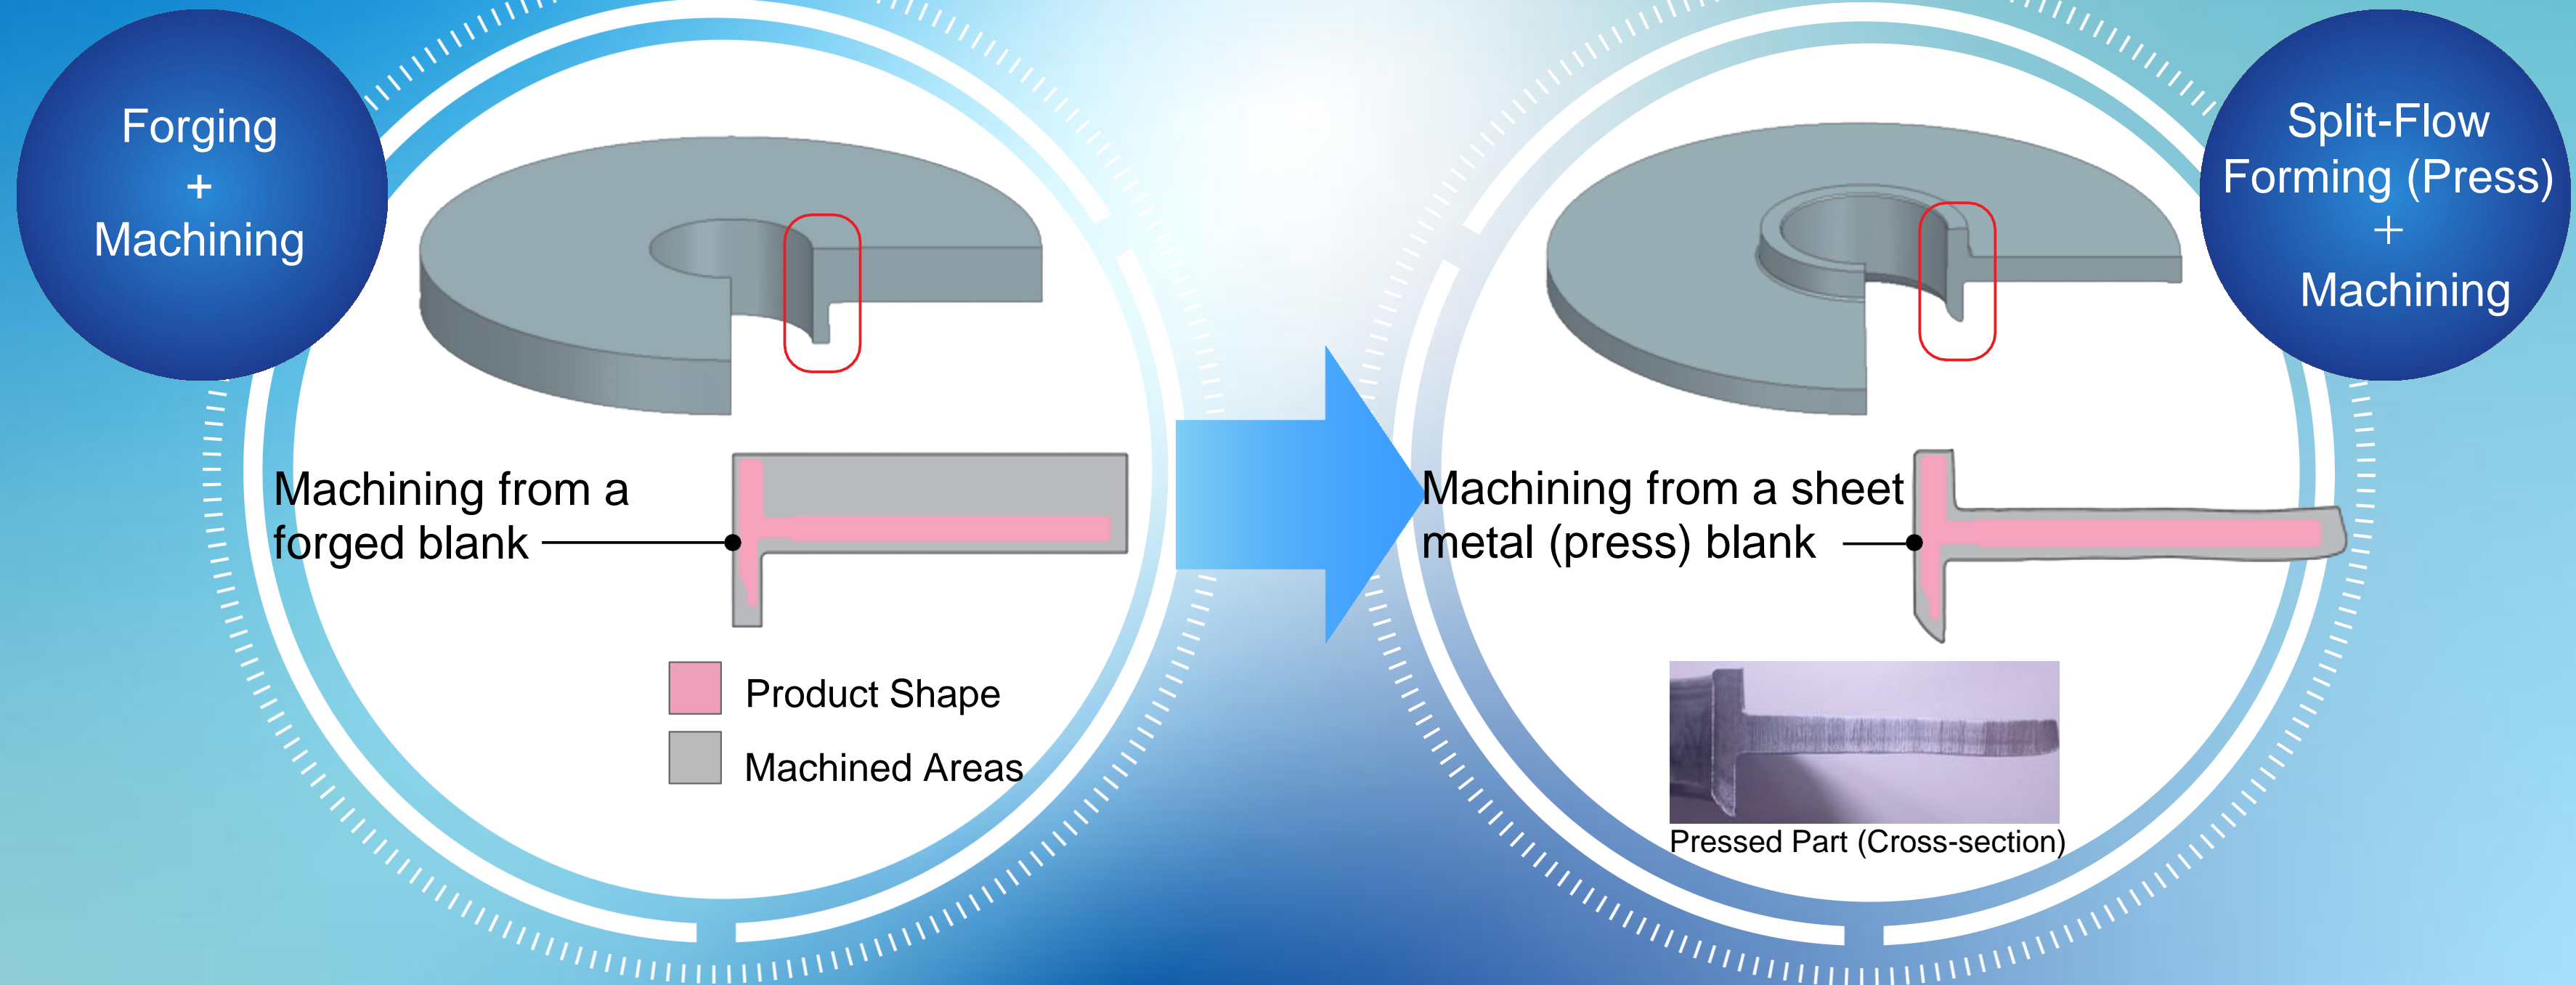

Product Features **【Machining allowance : 64% Reduction】**

Compared to our conventional methods

- Achieving a 64% reduction in machining allowance by the press split-flow forming
- Applicable to both internal and external features

Product Technology

- Split-flow forming achieved by controlling material flow directly from sheet metal

Pressing Toward a Brighter Tomorrow
