

Plastic parts with sound absorption properties

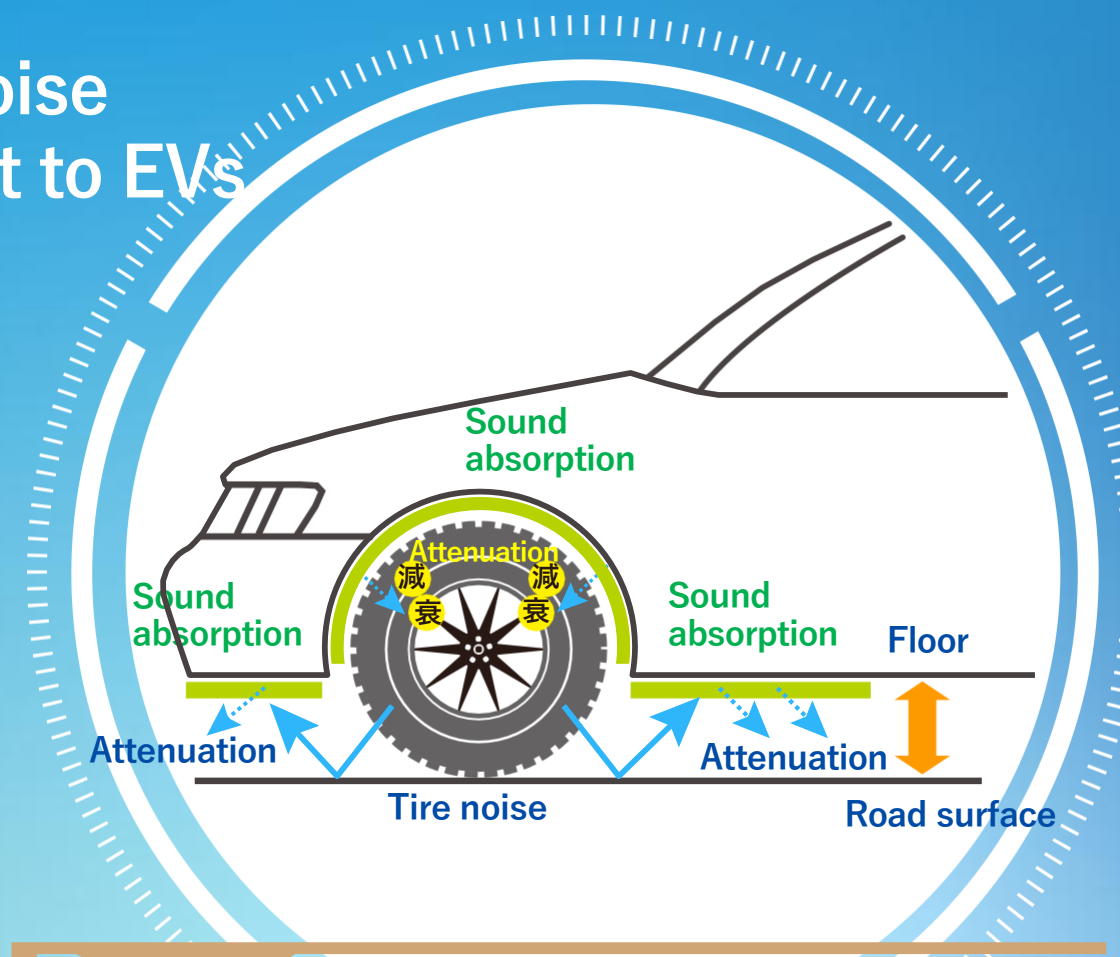

- Mass-Produced
- Prototyping Available
- Independent development

Plastic

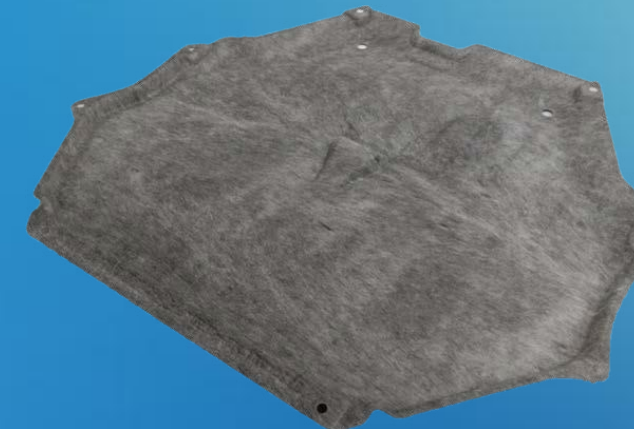

Product Features

- Response to Vehicle Quietness in Electrification
- By applying a new fiber material (PP + GF + PET + Foaming Agent), sound-absorbing performance is integrated into cover components.

Transition of vehicle noise sources due to the shift to EVs

Product Technology

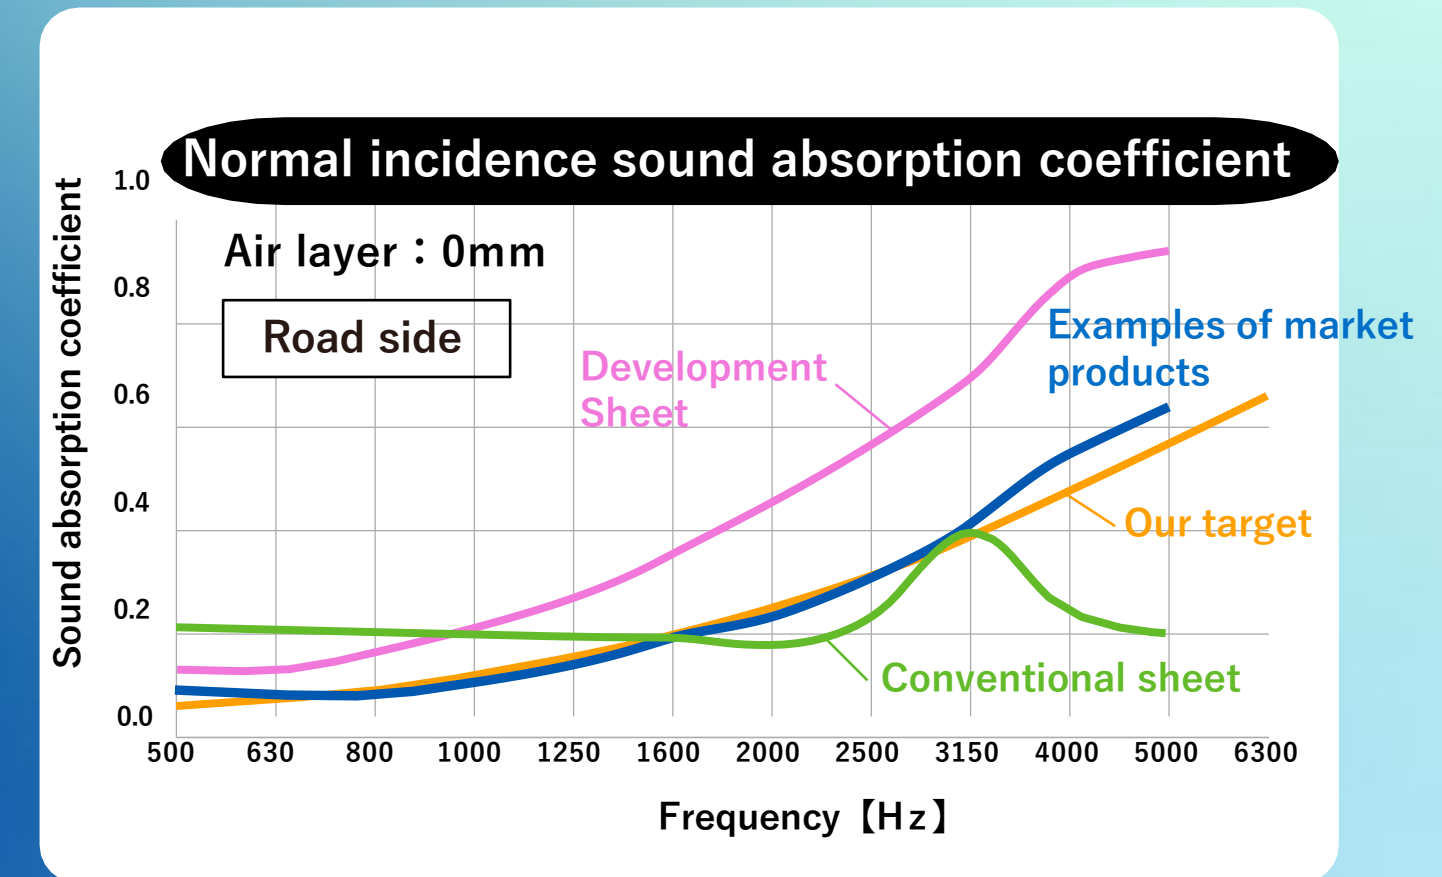

Under Covers
Floor Covers

Front & Rear Fender Protectors

Effects of applying developed materials

Sound absorption performance

Rigidity

20% Increase

Ice Removal Load

30% Reduction
